

VB100 CERTIFICATION REPORT OCTOBER 2020

VB Test Team

For more than two decades, *Virus Bulletin* has set a minimum standard for anti-malware products – requiring them to block malicious executables that have recently been seen in the wild, while at the same time blocking few to no legitimate programs – and providing those products that live up to expectation with the VB100 ‘stamp of approval’.

This report details the VB100 certification results of 41 such products from 35 different vendors during September and October 2020.

THE VB100 SET-UP

In the VB100 test, a copy of the product to be tested is installed on two platforms: *Windows 10* and *Windows 7*. On each platform, and at three different times in the test, the product is asked to scan both the latest version of the WildList¹ and a selection of clean files taken from *Virus Bulletin*’s own set of files belonging to widely used legitimate software.

A legitimate file that is blocked at least once is considered a false positive, while a WildList file that isn’t blocked is considered a miss.

A product achieves a VB100 certification if:

- No more than 0.5% of WildList samples are missed and
- No more than 0.01% of legitimate files are blocked

¹ The WildList is an extremely well-vetted set of malware recently observed in the wild by researchers: <http://www.wildlist.org/>.

For full details, we refer to the VB100 methodology on the *Virus Bulletin* website: <https://www.virusbulletin.com/testing/vb100/vb100-methodology/vb100-methodology-ver1-1/>. This test used version 1.1 of the VB100 methodology.

DIVERSITY TEST

The malware part of the VB100 certification uses the WildList, a regularly updated list of extremely well-vetted malware samples, guaranteed to have been spotted in the wild multiple times. This makes them very suitable for a certification test like VB100.

The ‘Diversity Test’ looks at products’ detection of another set of recent malware samples, to acknowledge the fact that products detect malware samples beyond a standard set of samples, and provides a measure of that detection.

PRODUCTS & RESULTS

Products were allowed to download updates during the course of the test. The version numbers listed in the results that follows refer to those at the start of the test.

Acronis Cyber Protect

Windows 7 version	12.5.23140
Windows 10 version	12.5.23140
WildList detection	100.0%
False positive rate	0.000%
Diversity Test rate	100.00%

Acronis True Image 2021

Windows 7 version	Build 30480
Windows 10 version	Build 30480
WildList detection	99.9%
False positive rate	0.000%
Diversity Test rate	100.00%

**AhnLab V3 Endpoint Security**

Windows 7 version	9.0.63.3
Windows 10 version	9.0.63.3
WildList detection	100.0%
False positive rate	0.000%

**VirIT eXplorer PRO**

Windows 7 version	9.2.67
Windows 10 version	9.2.64
WildList detection	100.0%
False positive rate	0.000%
Diversity Test rate	63.46%

**TUXGUARD Endpoint Protection**

Windows 7 version	1.0.1.46
Windows 10 version	1.0.1.46
WildList detection	100.0%
False positive rate	0.000%
Diversity Test rate	100.00%

**APPENDIX 1: PRODUCTS NOT CERTIFIED**

The following products did not receive VB100 certification in this test:

- *SecureAge SecureAPlus Pro* with offline settings. This product failed to meet the requirements for VB100 certification.

APPENDIX 2: TESTING NOTES

- *Tabidus Technology's United Endpoint Protector* was tested only on *Windows 10* as there is no *Windows 7* version of the product.

APPENDIX 3: SAMPLE SET SIZES

The Certification Set contained 1,666 malicious samples. The set of clean samples used for the false positive test contained 99,999 files, of which 29,152 were portable executable (PE) files. The set used for the Diversity Test contained 999 malicious samples.

Head of Testing: Peter Karsai

Security Test Engineers: Gyula Hachbold, Adrian Luca, Csaba Mészáros, Tony Oliveira, Ionuț Răileanu

Sales Executive: Allison Sketchley

Editorial Assistant: Helen Martin
