# VB100 TEST REPORT

## Executive summary

We tested **Net Protector Total Security** (version 2024.10.02.1) on October 2, 2024, on Microsoft Windows 11 Pro, 64-bit, 10.0.22631, as per the 1.6 version of the VB100 methodology.

**The tested product has successfully met the VB100 test criteria, with a malware detection grade of B.**

### Test criteria:

- The product must detect at least 75.00% of all test cases in the Certification set (malicious samples).
- The product must not generate more than 0.05% false alarms in the Clean set (legitimate program samples).

## Where to find more details

For detailed test results, please consult the rest of the report. You may also find the links below useful for up-to-date information on how to interpret the report data.

# VB100 TEST REPORT

## Test sets and product response

The VB100 test uses multiple sets of malicious and clean test cases to verify the ability of the tested product to detect malware, and to do so without generating false alarms for legitimate programs.

### AT A GLANCE

CERTIFICATION	CLEAN
Description	Description
Common and prevalent Windows malware recently observed in the the wild.	A random selection of some widely and less widely used legitimate program files.
Type	Type
	
Outcome	Outcome
<b>Pass</b> 	<b>Pass</b> 
Detection rate	False alarm rate
<b>96.53%</b>	<b>0.017%</b>
Best possible outcome: 100.00% Requirement: >= 75.00%	Best possible outcome: 0.00% Requirement: <= 0.05%

### DETAILED TEST RESULTS

Total cases tested	Total cases tested
<b>2,077</b>	<b>100,000</b>
Cases detected	Cases with false alarm
<b>2,005</b>	<b>17</b>
Cases missed	Cases without false alarm
<b>72</b>	<b>99,983</b>

### TEST SET COMPOSITION

Windows PE executables	Windows PE executables
<b>2,077</b>	<b>29,608</b>
Other file types	Other file types
<b>0</b>	<b>70,392</b>

# VB100 TEST REPORT

## Report notes

Report notes contain complementary information that may be of interest to the report reader. Likewise, any extraordinary circumstance—particularly, those that may affect the test results—are recorded in these notes.

**All measurements in this report are based on the on-demand scanning of samples. While VB has observed real-time activity from the product, it appears to be asynchronous in nature and is not captured by the VB100 test methodology during the real-time stage; instead, it is attributed to the on-demand stage. The vendor confirmed this and explained that the asynchronous scanning of files is implemented to enhance throughput.**
