VB100 TEST REPORT

Executive summary

We tested **Exosphere Endpoint Protection** (version 1.24.15.1) on November 1, 2024, on Microsoft Windows 11 Pro, 64-bit, 10.0.26100, as per the 1.6 version of the VB100 methodology.

The tested product has successfully met the VB100 test criteria, with a malware detection grade of A+.

Test criteria:

- The product must detect at least 75.00% of all test cases in the Certification set (malicious samples).
- The product must not generate more than 0.05% false alarms in the Clean set (legitimate program samples).

Where to find more details

AMTSO Standard Compliance

Virus Bulletin executed this test in accordance with the AMTSO Standard of the Anti-Malware Testing Standards Organization. The compliance status can be verified on the [AMTSO website](#).

Test sets and product response

The VB100 test uses multiple sets of malicious and clean test cases to verify the ability of the tested product to detect malware, and to do so without generating false alarms for legitimate programs.

AT A GLANCE

| CERTIFICATION | CLEAN |
|---|---|
| Description | Description |
| Common and prevalent Windows malware recently observed in the the wild. | A random selection of some widely and less widely used legitimate program files. |
| Type | Type |
|  |  |
| Outcome | Outcome |
| Pass  | Pass  |
| Detection rate | False alarm rate |
| 99.65% | 0.001% |
| Best possible outcome: 100.00% Requirement: >= 75.00% | Best possible outcome: 0.00% Requirement: <= 0.05% |

DETAILED TEST RESULTS

| | |
|--------------------|---------------------------|
| Total cases tested | Total cases tested |
| 1,986 | 100,000 |
| Cases detected | Cases with false alarm |
| 1,979 | 1 |
| Cases missed | Cases without false alarm |
| 7 | 99,999 |

TEST SET COMPOSITION

| | |
|------------------------|------------------------|
| Windows PE executables | Windows PE executables |
| 1,986 | 29,699 |
| Other file types | Other file types |
| 0 | 70,301 |

VB100 TEST REPORT

Report notes

Report notes contain complementary information that may be of interest to the report reader. Likewise, any extraordinary circumstance—particularly, those that may affect the test results—are recorded in these notes.

1

All measurements in this report are based on the on-demand scanning of samples. While VB has observed real-time activity from the product, it appears to be asynchronous in nature and is not captured by the VB100 test methodology during the real-time stage; instead, it is attributed to the on-demand stage. The vendor confirmed this and explained that asynchronous retrieval of files has been implemented to minimize the impact on endpoint performance.
